

Mercer - FSM Pro

Lead UI designer/developer on the redesign of the FSM Pro application front-end. Collaborated with UX designers, back-end developers and business stakeholders to create a modern version of a older native iOS app for the web.

My Role

Lead UI Designer & Developer

Design Methodologies

Redesign of product that was originally a native iOS app. Use of highcharts.js for charting.

Business Goals

To redesign the user interface and work flows for the end user to compete with other products on the market. The redesign effort was to bring a more modern design look and feel to the product.

Project Team

1 UX Designer and 1 UI Designer

Duration

4 Months

Project Status

Went live into production

Actual Results

Product redesign was well received and was completed on time and on budget.
